GO term enrichment

	homophilic cell adhesion via plasma membrane adhesion molecules
	cell-cell adhesion via plasma-membrane adhesion molecules
• •	calcium-dependent cell-cell adhesion via plasma membrane cell adhesion molecules
\bullet \bullet	synapse assembly
\bullet \bullet	cell junction assembly
• • •	response to growth factor
• • •	synapse organization
	tissue morphogenesis
• • •	chemical synaptic transmission
• • •	anterograde trans-synaptic signaling
•	regulation of cell adhesion
• • •	cellular response to growth factor stimulus
• • •	negative regulation of cell differentiation
• • •	skeletal system development
• • •	regulation of cellular response to growth factor stimulus
• • •	negative regulation of cell population proliferation
• • •	embryonic morphogenesis
•	blood vessel development
• • •	limb morphogenesis
• • •	appendage morphogenesis
• • •	morphogenesis of an epithelium
• • •	limb development
• • •	appendage development
